very draft message/questions to residents

Helen Duteau, Victoria Binetti, Michael Kulik, Walter
Ron Borsellino to: Wilkie, Kathy Hodgkiss, Gerald Heston, Dennis Carney,
Cecil Rodrigues, KarenD Johnson, capacasa.jon, Judith

12/19/2011 12:24 PM

just started jotting down thoughts - having a meeting with Helen and Mick to discuss messaging at 1pm if
folks want to join us in my conference room

Messaging to Residents.docx

Ron Borsellino
Director
Hazardous Site Cleanup Division

Messaging to Residents

- While earlier data presented to EPA indicated private well drinking water presented no immediate health risks, data recently provided to EPA raises some concerns.
- Because we don't have enough information on how the samples and analysis were done, we cannot rely on it to make a final determination, so we are planning on taking samples ourselves (and will split these samples with the state and Cabot?)
- In addition to the quality of the data, we are unsure of:
 - o The total number of residents drinking water wells potentially impacted
 - o Which residents have an alternate water source and who provided it
 - o Which residents are not covered under the Consent Agreement between the state and Cabot
 - o Which residents have accessed the escrow account
- So we need to know:
 - o Do you believe your well is being impacted?
 - o Do you have information (data) that has not been provided to EPA?
 - o Do you have a treatment system?
 - If yes, do you believe it is working?
 - o Are you using an alternate water supply ?
 - If yes, what is the source
 - o Do you know other residences which may be impacted?
